QUALITY – OUR OPERATING PRINCIPLE

Reliable:

You can rely on us – in every respect. We stand by our agreements and deadlines. We deliver high-quality service and spare parts at fair and transparent prices – with no hidden costs.

Efficient:

We plan your service in a port that suits you and perform efficient and diligent on-board inspections. We provide estimates and work efficiently for the benefit of our customers.

Competent:

Our team of experienced technicians works in accordance with the latest standards and guidelines. We are approved by all major classification societies and recognised by various flag states. Our quality management system is ISO certified.

Our availability: worldwide

We are there for you. In most ports around the world. 365 days a year. Whenever you need us.

Sustainability

For Woell Marine, sustainability is an important concern. Through our cooperation partners in all major ports of the world, we are on site within short distances and thus avoid mobility-related CO₂ emissions. If long-distance flights do occur, we ensure CO₂ offsetting. Whenever possible, we repair plant and equipment to avoid new purchases and conserve resources. In a next step, we will have our environmental and climate protection measures certified.

ABOUT US

Our expertise

We are your first point of contact for Safety Services. We inspect rescue systems, deal with the certification of your safety equipment and procure the relevant spare parts where necessary. In short: Woell Marine is a growing Hamburg company for global service in maritime safety equipment. We have over 15 years of industry experience – on land and on water.

Our philosophy

We are just as committed to traditional values, such as reliability and fairness in dealing with our customers, as we are to a contemporary and dynamic method of operation. We want to be more than just a service provider. We believe that reliable partnerships and long-term business relationships are the key to a successful future.

Our service

Tight schedules, changes at short notice, difficult circumstances – in seafaring, every day throws up new obstacles to navigate. Our many years of experience mean that we are familiar with the challenges faced by our customers. That's why we make sure that we respond quickly and flexibly to urgent requests. We firmly believe in taking your personal approach to your concerns.

SERVICE CONTRACT

A service contract offers you less effort and calculable costs. Take advantage of the flat-rate prices for our services and reduce your administrative and organisational workload. If you wish, we can also take on the monitoring process for you, so that maintenance or inspection dates are always met on time. Bundled service also helps you to reduce the CO₂ footprint.
